

Taking water to the world

Petainer is a gamechanging, innovative PET and other plastics packaging company

We are a zero waste™ business – sustainability is built-in to all we do

Our vision is to become the world leader in our sector by offering gamechanging solutions to global brands and pioneering businesses.

This vision is built on the principle of excellence in sustainability; we deliver this through our zero waste™ programmes.

This programme is a commitment to create effective operations and sales processes, it is part of our promise to customers to deliver high performance packaging that meets consumers quality expectations while reducing the Total Cost of Ownership (TCO) for your business and the environment.

“Petainer combines business understanding and problem solving with genuinely sustainable packaging innovation to deliver solutions to our customers supported by outstanding service levels.”

*Annemieke Hartman-Jemmett,
Commercial Director, Petainer*

Turnkey solutions

Petainer offers a total system solution, bespoke – like our containers – to fit your business. Whether it's preforms for in-house blowing or shelf ready packaging, Petainer is able to provide a total packaging solution.

Let's develop a packaging solution that's tailored to your business.

The 2 stage process

Petainer's two stage process involves the creation of a highly engineered preform which is then stretched and blown into a container.

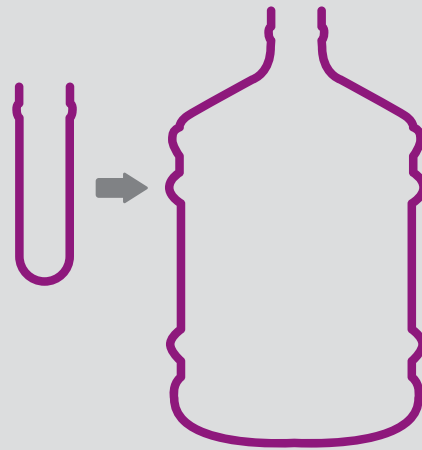

This process delivers:

- Enhanced durability for improved content protection and food safety.
- The ability to replicate any existing cooler designs in PET.
- Increased flexibility and efficiency of operational processes.

Petainer's two stage process enables flexibility through the supply of ready-to-use coolers or preforms.

Local manufacture can occur using one of Petainer's business partners to blow and ship the cooler or through the use of an on site – "Hole In The Wall" – blowing facility for a seamless blow and fill supply chain.

Preform shipment minimises supply chain cost through reduced logistics cost, improved payload and superior inventory management.

Barrier technology

Petainer understands our customer's product DNA. We are able to recommend the best barrier technology for products ranging from CSD, tomato sauce to dairy to ensure content quality and increase shelf life.

BPA-free water cooler bottle for 100% pure water

With improved payload, double the trip cycles and reduced carbon footprint, petainerCooler™ demonstrates that environmental sustainable packaging can drive commercial success.

Petainer recognises brands are challenging the capabilities of packaging performance to deliver superior consumer experiences through accessing new channels and markets.

A lightweight, BPA free cooler with superior durability and double the trip cycles of other plastics; petainerCooler™ takes water to the world.

15% weight of glass

BPA-Free

Returnable

Refillable

Taste 100% guaranteed

Recyclable

Seal

Smooth, un-edged rim provides a tight and safe seal

Contact Points

Reduce scuffing points for an enduring high quality finish

BPA Free

Guaranteeing consumer safety now and in the future

Unique Formulation

Washable at 60°C

Durability

Lightweight solution with at least double the lifecycles vs competitor PET

petainerCooler™

petainerCooler™ is available with and without handle to offer customers flexibility and meet requirements of different markets.

The handle is:

- Constructed from 100% PET
- 100% recyclable
- Included at blowing of the preform
- Durable for supply chain requirements

With handle

Without handle

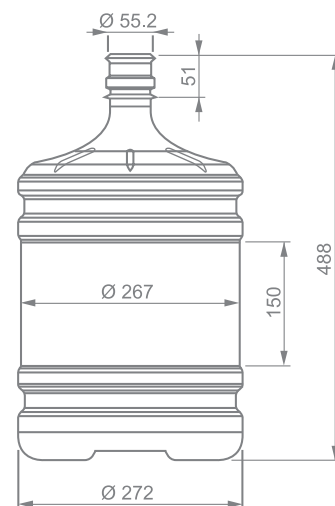

Seamless Compatibility

Available with or without handles, the petainerCooler™ is compatible with most major water cooler filling, cleaning and dispensing systems.

petainerCooler™ is the beginning of innovative solutions that delivers the functionality and performance your product deserves without the complexity.

petainerCooler™

Description	Unit	petainerCooler™	
Height	mm	488	
Outer Diameter	mm	272	
Neck Size	mm	55	
Volume ; Brimful	L	18.95	
Empty Weight	g	626 without handle	748 with handle
EU / NSF / FDA Approved	-	PET	
Colour	-	Blue	

Setting the benchmark

Petainer only selects BPA free resins. We then combine our expertise in polymer engineering and blowing capability to produce petainerCooler™ - a robust container that ensures customers enjoy the refreshing taste of water the way it was intended; with no off taste or taint.

petainerCooler™ delivers functionality and performance: reducing the Total Cost of Ownership (TCO) for our customers and the environment.

- 2:1 trip rate
- Industry-leading durability
- Reduced shrink rate per wash
- 100% recyclable
- Reduced carbon emissions vs Polycarbonates

“PetainerCooler™ offers our customers market-leading, cost effective bulk water packaging. Manufactured from PET and 100% BPA Free, petainerCooler™ makes the perfect choice for brand owners seeking consistent product performance and guaranteed consumer safety”

Herwig Libuda, Sales Director, CEE, Petainer

Reduce costs, grow markets and behave more sustainably by joining these gamechanging brands in the Petainer community

“At Fontana we have been using the petainerCooler™ in our distribution channel since 2013. We are very satisfied with the performance of the PET container in our supply chain and confirm that the petainerCooler™ in our supply chain now exceeds 40 trips. A durable solution for Fontana.
