

Reduce costs, grow markets and behave more sustainably by joining these gamechanging brands in the Petainer community

“Petainer’s PET preforms allow us to offer our customers a credible alternative to the 1 stage HDPE packaging solution currently on offer in the market. With the ability to buy preforms, we are able to buy high quantities of preforms and blow them on-site at the point of need. Reducing our freight costs, and optimising our warehousing facilities.”

Steve Prefontaine
Purchasing & Estimating Leader,
N.E.W. Plastics Corporation USA

Lift the lid on a world of opportunity

Petainer is a gamechanging, innovative PET and other plastics packaging company

We are a zero waste™ business – sustainability is built-in to all we do

Our vision is to become the world leader in our sector by offering gamechanging solutions to global brands and pioneering businesses.

This vision is built on the principle of excellence in sustainability; we deliver this through our zero waste™ programmes.

This programme is a commitment to create effective operations and sales processes. It is part of our promise to customers to deliver high performance packaging that meets consumers quality expectations while reducing the Total Cost of Ownership (TCO) for your business and the environment.

Great Results

1+1=3

“Petainer combines business understanding and problem solving with genuinely sustainable packaging innovation to deliver solutions to our customers supported by outstanding service levels.”

*Annemieke Hartman-Jemmett,
Commercial Director, Petainer*

Turnkey solutions

Petainer's offers a total system solution, bespoke – like our jars – to fit your business. Whether it's preforms for in-house blowing or branded jar complete with closure, Petainer is able to provide a total packaging solution.

Let us develop a packaging solution that's tailored to your business.

The 2 stage process

Petainer's two stage process involves the creation of a highly engineered preform which is then stretched and blown into a container.

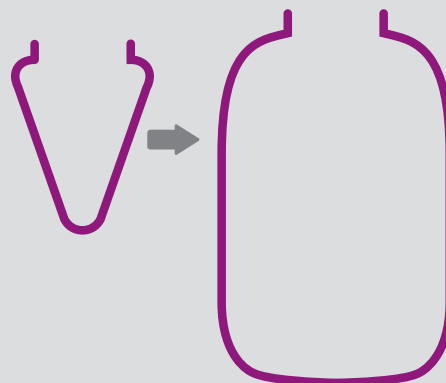

This process delivers:

- Enhanced durability for improved content protection and food safety.
- The ability to replicate any existing jar designs in PET.
- Increased flexibility and efficiency of operational processes.

Petainer's two stage process enables flexibility through the supply of ready-to-use jars or preforms.

Local manufacture can occur using one of Petainer's business partners to blow and ship the jar; or through the use of an on site – "Hole In The Wall" – blowing facility for a seamless blow and fill supply chain.

Preform shipment minimises supply chain cost through reduced logistics cost, improved payload and superior inventory management.

Barrier technology

Petainer understands our customer's product DNA. We are able to recommend the best barrier technology for products ranging from CSD, tomato sauce to dairy to ensure content quality and increase shelf life.

petainerJar™ opens a world of opportunity

With lower transport costs, reduced carbon footprint and a more reliable carrier, petainerJar™ lifts the lid on a world of opportunity.

Petainer recognises brands are challenging the capabilities of packaging performance to deliver superior consumer experiences through accessing new channels and markets.

petainerJar™ is suitable for a wide range of applications from confectionary to sports nutrition. petainerJar™ can be customised beyond design – developing and utilising technologies that challenge the limitations of conventional packaging.

Bespoke design

Recyclable

Maximise freight

2 stage process

Taste 100% guaranteed

Reduced lead times

Seal

Calibrated neck finish provides a tight and safe seal.

Barrier Technology

Moisture, Oxygen and UV protection for superior shelf life.

Bespoke

Extensive branding opportunities and capabilities.

Durability

Lightweight solution that provides content protection and safety.

The range

petainer Jar™ is versatile, offering extensive variety in size, colours, moulds and materials to provide a comprehensive solution for your portfolio. Contact us to discuss how petainer Jar™ can be tailored to your needs.

Customisation

Petainer can provide preforms or blown jars in any colour choice. Some of these are shown below.

Materials

petainer Jar™ is available in PET, HDPE and CPP. Material selection depends on a combination of intended contents, barrier protection and filling method.

Petainer will consult with customers to assess any performance requirements to deliver best in class packaging for your brand.

Sizes

This table shows the standard variations of petainerJar™ however all sizes, colours and moulds are fully customisable.

Description	Unit	petainerJar™	
Neck Diameter	mm	110*	120*

Volume	ml	750-5000	1200-7600
Weight	g	53 – 140	75 – 240
Height	mm	110 – 253	112 – 299
EU / NSF / FDA	-	Approved	
Food Grade/BPA Free	-	Yes	
Shape & Colour	-	Customised	

“petainerJar™ empowers brand owners with bespoke and durable packaging that delivers content integrity and consumer safety. Combined with opportunities for on premise blowing which can significantly reduce inbound logistics, carbon footprint and provides greater flexibility for filling operations, as units can be blown to demand, rather than kept on stock.”

Paul Box, Sales Director Special Projects, Petainer
